Results-oriented software engineering professional with 2+ years of experience in building C++ secure applications/APIs for backup & storage related technologies . An excellent team player and innovator with deep knowledge in latest industry trends and advancements.

Work History

2020-10 - Current

Software Engineer

Veritas Technologies LLC, Pune, Maharashtra

- Worked on restore support for **Nutanix-AHV(Acropolis).**
- Added support **of agent based granular file and folder** restore, and also designed the restful API for the same.
- Also working on adding support **agentless file and folder** restore.
- Worked on JSP framework for developing Restful API.
- Some experience on **Incremental backup** of some virtualization workloads.
- Worked closely with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance.

2018-07 - 2020-09

Associate Software Engineer

Veritas Technologies LLC, Pune, Maharashtra

- Worked on Backup and Restore support for different **Virtualization** workloads, mostly **bare - metal hypervisor** like **VMware(ESXi), RedHat virtualization(KVM).**
- Build code infrastructure for solving **man in the middle** attack by using **CA Certificate and CRL validation** also upgraded **TLS to v1.2** for **VMware vCenter.**
- Familiarity with system level technologies like **file-system, and storage.**
- Develop and move component from JNI to design the **backend service in C++** using different **designing patters** .
- Debugged code and **located root causes** of problems by reviewing configuration files and logs.
- Provide end to end **automation support** to product functionality (in **PERL**).

2017-06 - 2017-06

Intern

Edelweiss Financial Service, Mumbai , Maharashtra

- Developed **Email Classifier from the scratch** using **Python** for HR operations.
- It automatically labeled the Email into **20 categories and 40 subcategories** .
- Used different python libraries like **NLTK, Gensim, Sklearn, Spacy** .
- Deploy it into using **Flask framework** .

2017-12 - 2018-01

Intern

GradMint (US Based Startup)

- Worked on mainly text data preprocessing and transforming into term-document matrixes in Python.
- Used regex for cleaning Text data.
- Calculate similarity between different documents using different algorithm.

Skills

- Algorithm implementation
- Virtualization & Cloud technologies
- C++, Object oriented programming & Designing
- Java , Perl , Python, Git/Github
- Software Development & Agile Planning
- SSL Cerificate, Storage Domain
- Node.js, Flask
- Code reviews

Personal Projects

Comment Toxicity Analysis

[https://github.com/ckshitij/Comment-Toxicity-Analysis]

- Used supervised learning for finding toxicity on social media comments.
- It can be used as a **python API** for comment analysis.
- Deployed on server using flask framework.

URL Shortener

[https://github.com/ckshitij/urlshort]

- A web application that shortens the long URL using node.js and express.
- Used Encoding techniques and store it into mongoDB database.

Education

2014-07 - 2018-06

Bachelor of Engineering: Information Technology

Army Institute Of Technology - Pune

Scored: 75.88%

2013-03 - 2014-05

Senior Secondary (10+2)

Army Public School - Lucknow

Scored: 92.2%

2011-04 - 2012-03

High School (10th)

Kendriya Vidyalaya SGPGIMS - Lucknow

Scored: 9.0 CGPA

Accomplishments

Summer Intern Program on Embedded System(Beagle Bone black)

- Design PCB from the scratch which used as taking ohm meter.

Coding Competition

- Participate and won many coding and debugging competition all over city.
- Secured 1123 rank in ACM-ICPC all over india.

Sports

- Participate and won many basketball tournaments all over city.
- Played and won Pune university cricket tournament.

Hobbies

- Watching Anime
- Cycling
- Cooking
- Reading manga
